

# INTER-COMPANY TRAINING

## ANALYSIS OF DESCRIPTIVE PROFILE QUESTIONNAIRES

### Target:

Occasional or regular users of FIZZ who wish to use the software to analyse data from descriptive profiles.

This training content follows on from the "Design of descriptive profile questionnaire" course but can be followed even if you have not attended the first part.

### Objectives:

To provide participants with the knowledge and methods needed to build Fizz questionnaires containing descriptives tests. The training will focus on examples corresponding to the classic activity of a sensory analysis service.

### Content:

Analysis of descriptive profile data:

1. Descriptive statistics & graphs
2. Graph of scores
3. Analysis of variance (ANOVA)
4. Principal Component Analysis (PCA)
5. Edition of simple reports

### Duration and format:

The training lasts 3 hours and is conducted online.

The use of two screens is recommended, one to follow the training and one to practice. The training is based on the latest version of the software, the options and functionalities may be different if you are not using it.

### Number of participants:

For the comfort of the participants, each session is limited to a maximum of 4 seats.

### Price:

375€/participant (then 260€/additional participant from the same company)
